

Thank you for purchasing our equipment. Please read this manual carefully and heed the safety warnings and instructions before installing, using or repairing the equipment. This will ensure not only the protection of persons, but also the long life of the equipment.

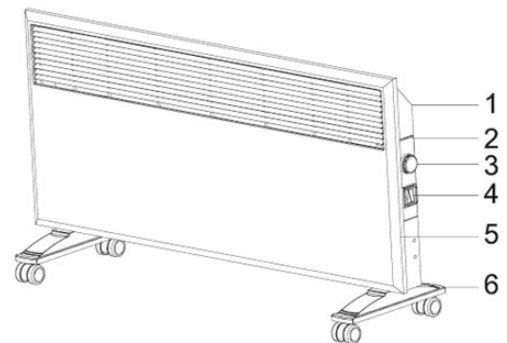

## TECHNICAL PARAMETERS

|              |                |
|--------------|----------------|
| Power input  | 220-240V, 50Hz |
| Power        | 1000/2000W     |
| Dimensions   | 730x260x480mm  |
| Coverage     | IPX4           |
| Cable length | 160cm          |

The device has an adjustable thermostat, overheating protection and the possibility of placing it on the wall or standing. Heating element: Aluminum X-sharp type.

## DESCRIPTION OF

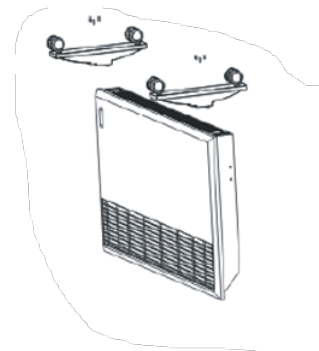

1. Rear panel
2. Control panel
3. Temperature control knob
4. Waterproof power switches (1000W/2000W)
5. Front panel
6. Wheels

## INSTALLATION

### A) Installation on the ground with feet

1. Turn the device over and screw on the feet.
2. Place the device in the desired location and plug the power cord into a power outlet.

### B) Installation on the wall

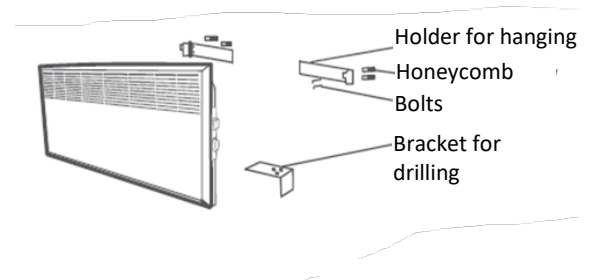

When wall mounted, the unit must be: at least 200mm above the ground, 500mm from the ceiling, and 200mm on the sides to allow for proper air circulation.

Pay attention to the distance between the device and other objects

It is forbidden to install the device under the socket. The device is IPX4 rated, meets the safety standard and can be installed in any room, including the bathroom.

### By hanging up

1. Measure the hanging distance according to the holes on the back of the device.
2. Insert dowels into the pre-drilled holes
3. Screw on both slotted brackets
4. Mount the device on the slotted brackets. There are holes on the rear panel for mounting.
5. Plug the power cord into a power outlet
6. Switch on the device

### By drilling

1. Screw the bracket to the bottom of the device on both sides
2. Insert the dowels into the pre-drilled holes and screw the bracket to the wall.
3. Plug the power cord into a power outlet
4. Switch on the device

NOTE: If you are installing the device in the bathroom, we recommend installing it in a place where it cannot be touched once you are in the bath or shower!

## CONTROL

To turn the device on, switch one or both side switches to ON and the corresponding indicator light will illuminate. Use the temperature control knob to adjust the temperature from MIN to MAX.

Note: The device has two switches. If you press one, the device will operate at a lower power, if you turn both on at the same time it will operate at a higher power.

When not in use, turn the temperature control knob to the minimum and switch the switches to OFF.

The device has a thermostat. Turn the control knob to MAX and turn the temperature control knob slowly counterclockwise when the desired room temperature is reached. As soon as a slight ding is heard, the device stops heating and the indicator light goes off. If the temperature drops below the desired level, the unit will start heating again.

## SAFETY NOTICE

- Do not place anything on the device or cover it with anything, as this could cause a fire.
- Use a soft damp cloth for cleaning and never use flammable liquids.
- Do not use the device if the power cord is damaged.
- If the device is visibly damaged, do not use it.
- Do not place the device under a power outlet or near flammable items.
- Do not use the device around baths, showers, or other places where water could get into it.
- The appliance is not intended for persons who have insufficient experience and knowledge to operate it.
- Children may only use the device under the supervision of a responsible person.
- At the end of the equipment's service life or after it has been damaged, dispose of it in a designated place. The equipment does not belong in normal household waste.

The product has been issued with a CE declaration of conformity in accordance with the applicable regulations.
