

Thank you for purchasing our product. Before installing, using or repairing the product, please read this manual carefully and pay attention to the safety warnings and instructions. This will ensure not only personal safety but also the long-term durability of the product.

INSTALLATION

Switch off the power supply before installation!

1. Measure the installation holes
2. Pre-drill the holes
3. Insert wall plugs into the pre-drilled holes
4. Screw the bracket in place
5. Thread the cables through the holes in the light fitting
6. Attach the hollow screws to the base
7. Thread the supply cable through the hole in the base and attach the base to the bracket
8. Screw the base in place using the side screws
9. Connect the supply cable
10. Switch on the power supply
